Microsoft 365 Tenant Audit & Telemetry Report

A comprehensive assessment of license allocations, workload adoption patterns, security configurations, and workflow automation.

Tenant Name / ID:	test-tenant-12345
Report Generated:	June 06, 2026 at 11:13 AM
Assessment Status:	■ Audit Completed Successfully
Report Context:	Usage & Adoption Inventory

1. Subscribed SKUs Inventory Summary

This section outlines the licensing packages (SKUs) currently configured and active in your Microsoft Entra ID tenant scope, displaying total enabled vs. consumed license counts.

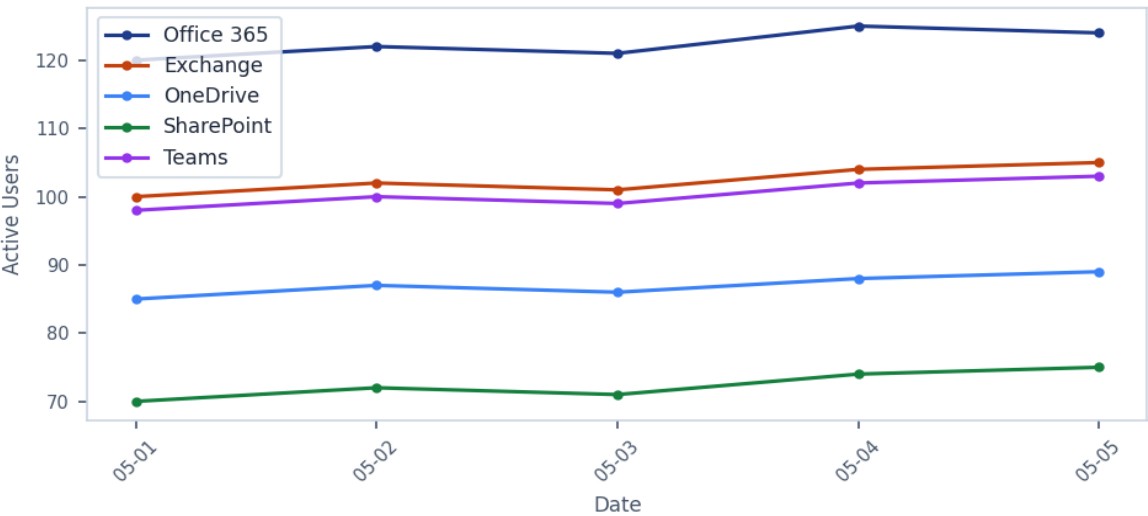

SKU Part Number	Allocated Units Status	Consumed Units
SPE_E5	Enabled: 150 Warn: 2	124
O365_BUSINESS_PREMIUM	Enabled: 45	42

2. Active Users & Application Usage

A breakdown of user activity across major Microsoft 365 services over the last 30, 90, and 180 days, representing actual adoption levels.

Service / License	30 Days Active	90 Days Active	180 Days Active
Exchange Online	120	110	100
OneDrive	95	90	85
SharePoint	80	75	70
Teams	110	105	98

O365 30-Day Active User Trend

Microsoft 365 Client Applications Usage (180 Days)

Displays the unique counts of active users on client applications (Outlook, Word, Excel, PowerPoint, OneNote, Teams) segmented by system platforms.

App / Platform	Active Users	App / Platform	Active Users
Word	90	Outlook	95
Excel	85	OneNote	40
PowerPoint	75	Teams	105

3. Workload Storage & Environmental Telemetry

A compiled summary of storage consumption, item counts, and device statistics across Exchange Online, SharePoint, and OneDrive workloads.

Exchange Online Mailbox & Resource Configurations

Metric / Telemetry Property	Exchange Mailbox Value
Total Mailboxes Analyzed	120 Mailboxes
Total Size of All Mailboxes	142.50 GB
Average Mailbox Size	1.19 GB
Total Emails Volume	458,201 Emails
Average Emails per Mailbox	3,818 Emails
Shared Mailboxes Count	12 Shared Mailboxes
Total Shared Mailbox Size	45.20 GB
Public Folders Count	4 Public Folders
Total Public Folder Size	1.20 GB
Room & Resource Reservation Enabled	Yes
Calendar Resource Pools (Rooms/Devices)	6 Rooms, 2 Equipment
Calendar Attachment Link Permissions	Yes
Integrated Calendar Connectors	None found

SharePoint & OneDrive Environment Telemetry

A comparison of file volume, storage consumption, site activity, and active synchronization clients.

Metric Property Description	SharePoint Sites (180d)	OneDrive Personal (180d)
Total Scope Count (Sites / Accounts)	28 Sites	120 Accounts
Total Storage Consumed	342.10 GB	890.40 GB
Total Stored File Count	45,812 Files	125,401 Files
Active Files Count (Active %)	12,450 (27.2%)	45,800 (36.5%)
Users with Sync Client Active	N/A (SharePoint level)	84 Users (70.0%)
Active OneNote Users	N/A (SharePoint level)	38 Users

4. Data Security, Governance & Compliance

A summary of classification sensitivity labels and data retention lifecycle policies configured within Microsoft Purview to protect corporate properties.

Microsoft Purview Sensitivity Labels

Sensitivity Label	Description	Shield	Mode	Priority	Status
Confidential	Sensitive Business Data	Yes	Enforce	10	Enabled

Microsoft Purview Retention Compliance Policies

Policy Name	Workloads Involved	Retention Duration Basis	Distribution Status	Status
Default 7 Year Retention	Exchange, SharePoint, OneDrive	7 Years (2555 days)	Success	Enabled

5. Power Platform & Automate Flows Analytics

An analysis of low-code cloud and desktop workflows configured inside the tenant environments, identifying complex workflows and premium connectors.

Power Platform Telemetry Property	Scanned Value
Total Environments Scanned	3
Total Flows (Active + Inactive)	50 Flows
Active Cloud Flows Count	35 Cloud Flows
Active Desktop Flows Count	4 Desktop Flows
Premium Connectors In Use	shared_sql
Custom Connectors In Use	0
Complex Business-Logic Flows Identified	0 Flows

Power Automate Flows Breakdown Chart
